Brightly

Brightly **Predictor**

Brightly Predictor Enterprise Services

It's our goal to get you up and running quickly and confidently – with implementation, training and consulting options to fit your needs and the needs of your team. And we'll be beside you every step of the way with the virtual and hands-on training necessary to have an effective and efficient implementation and a faster ROI.

Service options

Starter package	Designed for organizations with limited data and best served outsourcing their modeling on an ongoing basis
	We build everything for you, and you have access to all the cloud reporting and output
	Model development, without direct training
	One 2-hour workshop to review the models and logic
Package 1 **Essential Modeling**	Ideal for organizations that are best served outsourcing their modeling on an ongoing basis
	We build everything for you, and you have access to all the cloud reporting and output
	Model development, without direct training
	Up to two 3-hour workshops to review the models and logic
Package 2 **Remote training workshop with 1st generation model**	Best for organizations with a dedicated staff member that will own the model and has the expertise to take the model to the next level once training is complete
	Model development and training
	Train the trainer can be employed with this option with a 1st generation model only (e.g., limited data accuracy, service criteria, treatments and filters)
	If data quality is low, then GIS will most likely be unavailable
