

# CONTINUOUS IMPROVEMENT WITH APPEM

## HOW YOU CAN ENSURE CONTINUED SUCCESS

At Dude Solutions, we've adopted a five-step process - the APPEM framework - for making sure that your organization is working at peak efficiency. Optimize your operations with our combination of proven processes and powerful solutions.

1. **Assess** the current condition of your facilities, assets, work order management and processes

2. **Prioritize** your work based on the most important action items

3. **Plan** how you're going to accomplish the work you need - and how to prevent distractions

4. **Execute** on the plan you've created

5. **Maintain** (and **Modify**) your plan based on what worked, what didn't work and what you learned
