

# Space Management for Healthcare & Senior Living

## Bring Your Floor Plans to Life

**How do you visualize your facilities today? Whether there's a map in your head or a floor plan hung on the wall, there's an easier way to bring your facilities to life and connect critical work more efficiently for your staff and contractors. Space Management for TheWorxHub™ helps you find equipment, do work faster and map compliance needs all digitally (even on a mobile device).**

**Better visuals, better mapping and better work – all in one system.**

---

### How does it work?

Our Space Management module is a part of TheWorxHub, our operations management software, providing digital interior maps to show all your work and equipment, as well as compliance needs plotted on an interactive map.

With Space Management, you have an easy way to bring your facilities to life and streamline work with visual interior maps, space utilization tools and configurable layers for compliance information.

## Key Benefits

**Simplify the day-to-day.** Give your facilities and maintenance team anytime, anywhere access to the information and tools they need to do their job and visualize their work.

**See your daily work.** Plot your work orders, assets and more on a digital floor plan to easily group work by location and even envision how to reconfigure your space for better efficiency.

**Streamline staffing and scheduling.** Get staff up to speed more quickly on where they're working for the day, as well as make them aware of needs nearby.

**Map out compliance.** Integrate life safety and The Joint Commission requirements for compliance into your facility map to understand high-risk or problematic areas.

**Make documentation accessible.** Document historical information on equipment and work orders to ensure consistency when employees leave or when onboarding new staff.

**Understand space utilization.** Chart how your space is being used and how much square footage is allocated by room type or department.

**Go mobile.** Give technicians and staff mobile access to a shared facility map that they can pull up wherever they are.

## Product Features

---

### Interior Maps

- > Upload PDF, CAD or other image formats to create a visualization of your building interiors
  - > Asset and work visualization (from utilities to equipment)
  - > Map preventive maintenance (PM) tasks
  - > Support for Campus Maps for navigating specific building drawings
  - > Use for facility condition assessments
- 

### Space Utilization

- > Organize space by department and location
  - > Use square footage calculations to see how your space is being used by its primary occupants
  - > Tools for construction and project management
- 

### Life Safety Drawings Layer

- > Add critical life safety and The Joint Commission elements to your facility map (ex. evacuation routes, medical gas shut-offs, etc.)
  - > Survey and inspection tools for life safety tours
  - > Leverage additional layers to maintain your Statement of Condition and relevant plans for improvement
  - > Create unlimited custom layers
- 

### Asset Tracking

- > Quickly access manuals and equipment documentation
  - > Interact with assets and work within drawings
  - > Filter equipment on your map (ex. view only high-risk assets)
-

## TheWorxHub Suite

Dude Solutions offers a full suite of software applications to support all of your needs. Our connected ecosystem allows for seamless integration and workflow between each module.

### MAINTENANCE

Manage preventive maintenance, asset management and all maintenance tasks from one place

### SURVEYS & INSPECTIONS

Ensure a safe and healthy environment by easily scheduling surveys and inspections for EOC and fire and life safety

### PO & INVENTORY

More efficiently manage the usage and ordering of on-hand inventory

### HOUSEKEEPING

Automate the documentation of housekeeping tasks and streamline the QA process

### CAPITAL PLANNING

Protect your current budget, forecast life cycle and more to create an attainable capital plan

### SECURITY

Detailed security rounding, incident reporting and a dashboard to better track security

### SPACE MANAGEMENT

Find equipment easier, complete work faster and map compliance needs with visual interior maps

### WORXIQ

Enterprise solution with a visual, customizable dashboard for analytics on daily work (across sites), as well as industry-wide benchmarks

### TECHNOLOGY

IT help desk support, including request management and asset inventory

## Technical Requirements

We suggest the latest version of all browsers and mobile operating systems (OS) for the best experience. Please consult with your IT department to ensure that all browsers are up to date and capable of supporting TheWorxHub.

### INTERNET BROWSER

Latest versions are recommended

- > Google Chrome
- > Internet Explorer 11
- > Microsoft Edge
- > Mozilla Firefox
- > Safari (Mac OS)

### MOBILE OS\*

\*Amazon Kindle Fire and Kindle HD not supported

- > Android 5.0+
- > iOS 10.0+

### BARCODE SCANNING

- > Camera-based scanning requires a rear-facing camera
- > Bluetooth barcode scanners require support for 2D barcodes if using QR codes

### DISPLAY RESOLUTION

- > Desktop displays should be a minimum of 1024x768

## Client Support Information

All Dude Solutions clients have access to our Legendary Ongoing Support to ensure you get the most out of our solutions. In addition, you can elect on-site services to expedite the implementation process.

---

Legendary Ongoing Support	<ul style="list-style-type: none"><li>&gt; All Dude Solutions clients have a dedicated Client Success team member assigned to them so support continues even after implementation</li><li>&gt; Reach support via phone, email or chat for immediate answers</li></ul>
Implementation	<ul style="list-style-type: none"><li>&gt; System configuration and planning</li><li>&gt; Implementation objective planning</li><li>&gt; Interactive group trainings</li></ul>
On-site services	<ul style="list-style-type: none"><li>&gt; On-site, hands-on training</li><li>&gt; Basic to advanced asset data gathering and barcoding</li><li>&gt; Facility condition assessment, including on-site data services, data review and import</li><li>&gt; Preventive maintenance setup</li></ul>
