## PROFIT KILLERS

TO AVOID IN MAINTENANCE

When you combine all of today's concerns with the economy, the effects of the pandemic and changes in the way you work, it's a critical time for your maintenance operations.

**And you're the critical piece to helping ensure you can operate efficiently and profitably.**

But are you hindering your efficiency by promoting these profit killers? Let's see.

### LABOR & STAFF

- Poor team planning that leads to more reactive maintenance processes
- Wasted time using or chasing down paperwork on work orders, inventory, etc.
- Missing good instruction for maintenance tasks

### INSTEAD, YOU COULD BE:

- Optimizing team scheduling and work
- Using mobile to streamline your workflow
- Providing technicians with clear processes and instructions

### INVENTORY

- Stock-outs and not having the parts you need
- Stocking too many expensive parts or parts that expire over time
- Not having the parts you need when an asset stops working

### INSTEAD, YOU COULD BE:

- Using a digital and mobile system for parts management
- Avoiding stock-outs by having what you need, when you need it
- Utilizing just-in-time inventory and ordering

### EQUIPMENT & ASSETS

- Assets that don't last and need excessive repairs
- Wasting energy, parts and materials
- Wasting labor and technician time on finding and fixing assets

### INSTEAD, YOU COULD BE:

- Using asset barcoding to find information on assets quicker and easier
- Understanding why an asset isn't working
- Using data to decide if you should repair or replace an asset

### SAFETY & COMPLIANCE

- Not staying up to date on compliance regulations
- Having undocumented preventive maintenance
- Losing compliance or lowering levels of service, leading to fees, fines and risk

### INSTEAD, YOU COULD BE:

- Establishing a workflow for compliance-related tasks
- Documenting your safety practices
- Implementing a solid preventive maintenance plan with good ROI

**By avoiding these profit killers, operations professionals like you have the power to:**

Increase organization and production capacity > Integrate and streamline across many departments > Impact your organizational success and growth
