

OPTIMIZED, REAL-TIME CAPITAL PLANNING

Take control of your planning process with collaborative, visual tools that bundle optimized treatments from Capital Predictor™ into actionable capital work plans.

Work Planner is a GIS-enabled toolset bringing together all the data and optimized outputs from Capital Predictor, allowing engineers and planners to bundle assets and treatments into multi-year work plans across multiple asset types and allocate funding from multiple sources.

Together with Capital Predictor, Work Planner will help you strike the right balance among short-term needs, investing in the future and the strategic plans that will help your community thrive.

CAPITAL INVESTMENT PLAN

- Stakeholder transparency
- Fiscal management
- Budget approval
- Alignment with strategic vision

RESULTING IN BETTER CAPITAL PLANNING
