

Utility Bill Entry Services for Energy Manager™

Make actionable decisions based on utility usage

According to ENERGY STAR®, 30% of utility use in commercial buildings is wasted every billing cycle. With utilities being the second highest budget item for most organizations, building operators are aware of the waste reduction opportunity, but:

-  It's tough to keep your utility records up to date, resulting in an inability to make timely decisions
-  Limited budget keeps you from hiring specific energy experts to help manage utilities across your facilities
-  You aren't sure what to prioritize or where to invest your time and money

We understand the complexities of managing utilities, and we're here to help. That's why we offer two options of utility data entry services for clients to choose from – so you can spend less time worrying about getting data into the software and more time productively managing utilities.

Utility Bill Population (UBP)

UBP empowers clients to save time and reduce the administrative burdens on your team, ensuring your Energy Manager database is up to date with our team tackling the bill entry work.

Utility Bill Population includes:

- Monthly bill data population into Energy Manager acquired from your utility bills
- Assurance that bill data in Energy Manager is exactly as it appears from your utility company

Utility Bill Population & Management (UBPM)

UBPM goes one step further than UBPM. Not only does our team take on the monthly data entry work, but we also provide monthly energy consultation from our experts to help meet your goals.

Utility Bill Population & Management includes:

- Monthly performance and consultative meetings based on your utility cost, consumption and, if applicable, electric load profile analysis using interval data
- Identification of energy saving opportunities and action items for clients during monthly consultations with energy experts
- Monthly bill data population into Energy Manager acquired from your utility bills
- Assurance bill data in Energy Manager is accurate
- Investigation into irregular utility data, such as spikes of utility usage and/or cost, to ensure validity

For both services, all that is needed from you is either:

Login credentials for your utility vendors and verification that bills can be retrieved

or

PDF copies of your utility bills for population sent to the Dude Solutions team

Please contact your Dude Solutions sales representative for pricing on the above services.

Real results from clients

Last year alone, our client saved:

Energy Manager clients saved

\$203 MILLION

of electricity

Enough to hire

3,912

electricians

Energy Manager clients saved

8 BILLION

gallons of water

Enough to fill

12,363

Olympic-sized pools

Energy Manager clients reduced

1 BILLION kBTUs

of natural gas

Equal to removing

11,431

cars from the road for one year

About Dude Solutions

Dude Solutions is a leading software-as-a-service (SaaS) provider of operations management solutions to education, government, healthcare, senior living, manufacturing and membership-based organizations. For 20 years, Dude Solutions has inspired clients to create better work and better lives. We combine innovative, user-friendly technology with the world's smartest operations engine, empowering operations leaders to transform the most important places in our lives. Today, more than 12,000 organizations use our award-winning software to manage maintenance, assets, energy, events and more. For more information, visit dudesolutions.com.
