

# Advanced Training for Asset Essentials Connector Tool

**Our Advanced Training for the Asset Essentials Connector Tool ensures your systems start communicating right away! The training will get you started with the tool and ensure that you are able to batch import and export on a set frequency so you're getting the most out of Asset Essentials.**

---

## How does it work?

The Connector Tool is an on-premise tool installed on your in-house device that assists in batch imports and exports of CSV files. A Client Services Center consultant will help guide you through the installation and startup process plus a sample file demonstration. All you need to take this training course is an Internet connection.
