## Reasons to Invest in EAM to Improve Worker Safety

### Worker safety: A top reason to implement an EAM solution

An enterprise asset management solution centralizes operational data like work orders, inventory, maintenance schedules and more, offering visibility into your organization — all to protect your business and employees. The [2022 Green Quadrant®: EAM Software report](#) by global research firm [Verdantix](#) found that EAM systems are a key to improving worker safety.

Why are business leaders turning to EAM?

#### 1

##### Worker safety costs are sky high

**\$1 billion per week**

Worker's compensation costs<sup>1</sup>

**\$164 billion**

Cost of work injuries in 2020<sup>2</sup>

#### 2

##### Losing profits? Worker safety affects productivity

**\$45 billion**

Cost of lost worker productivity in 2020.<sup>3</sup>

**2.1 million**

Unfilled M&O jobs by 2030

**84% of executives<sup>5</sup> say**

Reducing worker-related unplanned downtime is a top priority

#### 3

##### Injuries and absences add up

**99 million**

Total days lost in 2020 as a result of injuries<sup>6</sup>

**\$2.5 billion**

The cost of worker absences in the manufacturing sector in 2019<sup>7</sup>
